Book Description

The Invisible Man is an 1897 science fiction novella by H.G. Wells. Wells' novel was originally serialized in Pearson's Magazine in 1897, and published as a novel the same year. The Invisible Man of the title is Griffin, a scientist who theorizes that if a person's refractive index is changed to exactly that of air and his body does not absorb or reflect light, then he will be invisible. He successfully carries out this procedure on himself, but cannot become visible again, becoming mentally unstable as a result.
